

Paulownia Wood Brand

Paulownia wood exudes warmth creating a calm, heartwarming atmosphere for you and your loved ones.

Paulownia wood is a fascinating, highly sustainable resource with infinite possibilities.

Paulownia wood

Warm

The warmth exuded from Paulownia wood calls out to be touched. Paulownia wood is physically warm to the touch and creates a spiritually warm, calm, and forgiving atmosphere.

Forgiving

The combination of the soft resiliency of Paulownia wood and rounded corners crafted by KIRICO, create a forgiving, safe environment for children and the elderly. Though it is soft, small dents and scratches can be fixed due to the resilient memory of Paulownia wood.

Light

Used for centuries in Japan for furniture, Paulownia furniture is easy to move creating a flexible, safe, barrier free environment. Paulownia wood has the highest strength to weight ratio of any wood.

Insulative

Paulownia wood, touch it, it feels warm—that is because it has an extremely low heat transfer coefficient. This means high insulation factors and low R values leading to savings in heating and cooling costs. Paulownia wood is also extremely fire resistant with an ignition temperature of 400°C, twice that of most other woods. For centuries treasured objects have been kept in Paulownia wood boxes, chests, and lined safes to protect them from fire.

Dry

Paulownia wood helps control humidity by absorbing and releasing water from the air. This helps protect objects from mold, water, and damage due to high humidity.

Stable

The tremendous dimensional stability of Paulownia wood make it the perfect material for precise craftsmanship. For centuries the durability of Japanese dressers have kept out insects, humidity and fire, protecting delicate silk and valuable items.

Sustainable

Paulownia wood is one of the most sustainable of all wood resources. Trees reach maturity and can be harvested after only 10–20 years. Furthermore, Paulownia wood has one of the highest carbon uptakes of all trees, helping to clean the air and soil.
